

## .dotfiles

a collection of my dotfiles

### Setup

#### Zsh Configuration

To set up zsh configuration:

1. Clone this repository
2. Run the setup script:  

```
cd zsh
./link-files.sh
```

This will create symbolic links for your zsh configuration:

- `~/.zshenv` → `~/.config/zsh/zshenv`
- `~/.config/zsh` → `/path/to/dotfiles/zsh`

The configuration will be automatically loaded when you start zsh.
